

## Green Solutions

Island Supply has been serving the hospitality industry in all three Cayman Islands and elsewhere in the Caribbean since the early 80's. For the past three years we have been developing our Green Solutions Campaign.

We believe that being at the forefront of the foodservice industry means we have an environmental responsibility. As we continue to grow we can actually become part of the problem unless we are prepared to change our practices and our product offerings.

In a nutshell, Green Solutions means replacing products that are not renewable, reusable or recyclable or that pollute our environment with products or systems that are Environmentally Responsible or at the very least renewable and non toxic.

Being the leader in commercial kitchen design and equipment supply in Cayman means we are in a unique position to assist in specifying equipment with the latest energy saving features. We have also recently introduced a bottle crusher suitable for use behind a bar that reduces glass waste by 85%.

Green Solutions is our fastest growing group of products. We have over eighty items spanning ten product categories.

From disposables, including cups made from corn, bamboo-based plates and take-out trays that replace Styrofoam to garbage liners from renewable sources, we carry a complete line of Environmentally Responsible cleaning products that are Green Seal approved, and when used in conjunction with micro fiber cleaning technology we can drastically reduce the amount of water and chemicals used in the cleaning process.

We look forward to serving you soon.

Environmentally Yours,

Chris Weaver  
General Manager
